## Upcoming Exhibitions

### Discover the Northern Inner Gate Tower of Turaida Castle!

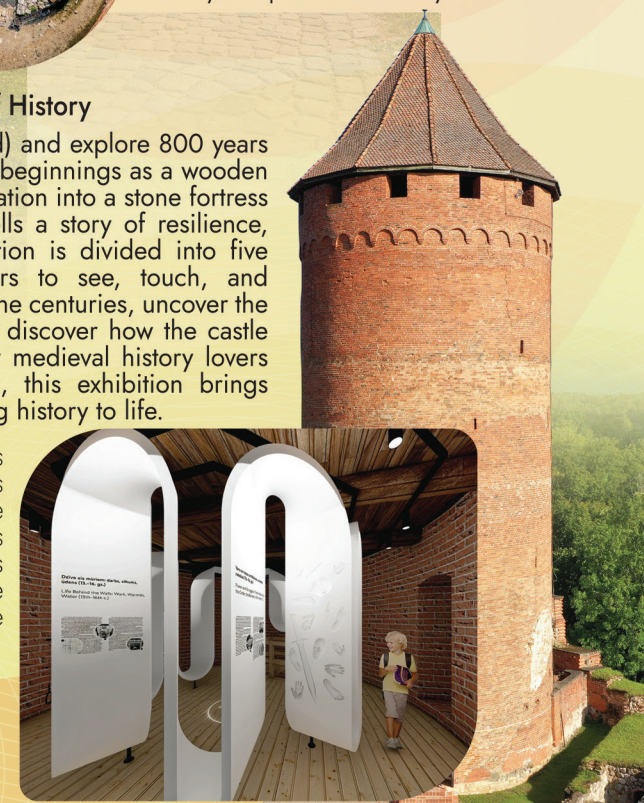

Built in the early 16th century, this tower was the largest and most impressive of Turaida Castle's round medieval towers. It once protected the castle's forecourt with firearms and, during peacetime, stored ammunition.

The new outdoor exhibition introduces visitors to the tower's defensive secrets, archaeological discoveries, and construction techniques. Interactive, exciting, and easy to access and explore – history to experience for everyone!

### Turaida Castle: Eight Centuries of History

Step into the Main Tower (Bergfried) and explore 800 years of Turaida Castle's history. From its beginnings as a wooden Livonian stronghold to its transformation into a stone fortress and today's museum, the castle tells a story of resilience, change, and heritage. The exhibition is divided into five historical themes, allowing visitors to see, touch, and experience the past. Walk through the centuries, uncover the lives of those who lived here, and discover how the castle evolved with the times. Perfect for medieval history lovers and curious travelers of all ages, this exhibition brings Turaida Castle's long and fascinating history to life.

The exhibition's artistic concept was developed by Kaspars Eglītis, Roberts Rubīns, Didzis Jaunzems, and Elizabete Palasiosa, in collaboration with researchers from the Turaida Museum Reserve. Its creation was made possible with the support of the Latvian Ministry of Culture and *Latvijas Finieris*.
